A Good Natured Engineer and His Mechanical Engineer. The locomotive is the highest type of machine work in point of durability. We cite this one in evidence. It was made at the Rock Island and Pacific shops in Chicago, Engine No. 3 of this road has been in service since June, 1878, when it was new. It has never been in the shop since, and none of the brasses except those on the cross-heads have been taken out for refitting, and these only once. Its mileage during the three years has been 115,369 miles, and it is considered good for 50,000 more before going into the shop. Its driving wheels are fifty-seven inches in diameter, and have Krupp's steel tires. Master Mechanic Twombly gives the credit of this performance to Jerry Shea, the engineer, who is constitu-tionally good-natured and never gets Hellman M his engine excited.

R. Gibbs, of Buffalo, N. Y., writes: "Your Burdock Bice Bitters, in chronic diseases of the blood liver a. I kinneys, have been signally marked with success. I have used them myself with best results, for torpidity of the liver and in case of a friend of mine suffering from dropsy, the effect was marvelous."

Mr. Noah Bates, Elmira, N. Y., writes: "About four years ago I had an attack of billious fever, and never fully recovered.
